SUPERIOR PRODUCTS

Mallory found we could make our customers safer and more productive with improved products by controlling the supply chain. Working directly with the manufacturer, we could create a shorter delivery time with increased inventory of feature-rich and value-packed products.

THIRD-PARTY TESTED AND PRODUCT AUDITS

Diamond M products deliver style, value and unique solutions. Mallory works directly with factories with our design specifications to create feature-rich items. Audits performed at these factories guarantee the items are being consistently produced to our requirements. Our direct relationship with world-class factories around the globe allows to bring cutting edge products to protect you at the best value.

CUSTOMER FOCUSED

Our close relationships with customers allows us to adapt to local market needs. Innovations occur across our product line, including the patented ENSA-APE-Escape Kit, cut-resistant rebar gloves, and scales for the vending machines.

OVER 120 YEARS OF EXCELLENCE

Mallory traces its history to the late 1800's when it was a major manufacturer of logging blocks. These blocks were advertised as "built stronger than seems necessary". Diamond M products are still built to that standard of excellence.

- ◆ Air flow control technology reduces sound across all frequencies without increasing earcup size
- ◆ Fits all head sizes

DM-HP40310 Deluxe Muff, NRR 28sold by PR

How does wearing dual hearing protectors change NRR?

When hearing protectors are worn in combination (i.e. earplugs AND earmuffs), rather than adding the two NRR numbers together, you simply add five more decibels of protection to the device with the higher NRR.

THUMB STYLES

Straight Thumb
For closed-fisted work (gripping). The seams are out of the work surface during gripping activities.

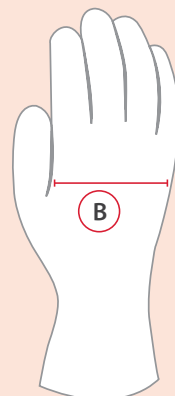

Wing Thumb
For open-handed work (pushing, pulling). The seams are out of the work surface during open-handed activities.

Keystone Thumb
Use for same activities as wing thumb styles, but affords the strongest construction method. It is the most comfortable glove to wear.

HOW TO FIND YOUR GLOVE SIZE

Usually one hand will be slightly larger than the other, typically the strong hand (e.g. the right if right handed). Using a tape measure, wrap the tape around the hand at the widest part as shown and make a loose fist. Round the measurement to the nearest whole inch. Locate your size from the chart above.

WiseSupply™ Conformable Sealant

- ◆ Specially formulated, 100% solids, conformable water tight coating
- ◆ Tape form allows for a greater surface coverage in a single application
- ◆ Ideal for sealing aluminum, steel, fiberglass, and plywood
- ◆ Because it is a 100% solids product, it will never become brittle and crack, leaving avenues for moisture to migrate through and reach the surface intended to be protected
